

12.45pm Chairman Opening Remarks

1.00pm Unlocking Blockchains Potential

- Hear how financial services firms are continuing to respond to the blockchain revolution to benchmark your organisation against your peers
- Assess the business case for blockchain adoption and how you can make the jump from POC to commercialisation to create value adding use cases
- Hear examples of where blockchains and adjacent technologies are delivering value within financial services

Adi Ben-Ari, *Founder & CEO, Applied Blockchain*

1.30pm Interoperability Challenges

- Explore the importance of interoperability for blockchain technology and how this is integral for its future within the financial services sector
- Discuss common concerns around interoperability to dispel myths and highlight challenges helping to ensure that you're prepared for blockchain adoption
- Pinpoint the areas where institutions need support to speed the adoption of blockchain and distributed ledgers whilst maintaining interoperability with existing systems

Mariana Gómez de la Villa, *Global Program Manager Blockchain, ING*

2.00pm Let's Get Real: Delivering Usable Blockchain Based Services in the Nordics

- Review Nordea's blockchain journey from 2015-2019 with a specific focus on the movement from PoCs to production
- Debate whether enterprise DLT networks are just shared databases masquerading as blockchains and whether they are necessary for your business
- Examine what it takes to move a blockchain network into production in a regulated environment

Ville Sointu, *Head of Emerging Technologies, Nordea*

2.30pm Building Solutions for Trade Finance

- Assess the ways that companies are looking to digitise documents, speed up trade and improve security through the use of blockchain technology
- Hear how DLT can help reduce fraud, human error and inadvertent delays whilst considerably cutting administrative costs
- Explore some of the live transactions that financial institutions are spearheading and the results from their live pilots

Roberto Mancone, *Chief Operating Officer, we.trade*

3.00pm Coffee Break

3.30pm The Financial Industry at the Era of The Internet of Value

- Review the blockchain landscape and its evolution from hype to reality by addressing the latest case studies
- Assess the new ecosystem and key success factors to help your company to thrive in this new environment
- Take a deep dive into the latest use cases in the asset management & asset servicing space to see how blockchains are challenging the status quo

Laurent Marochini, *Head of Innovation & Quality, Société Générale*

4.00pm Tokens and The Future of Illiquid Assets

- Review the emergence of digitally unique assets such as Bitcoin and Ether to fully appreciate the current crypto market
- Assess whether ICOs have exposed an untapped liquidity opportunity and what the impact of these innovations could be in the future
- Dive deeper into cultural adaption and adoption of illiquid assets and how the regulation of new business models should be used to protect consumers

Anthony Macey, *Head of Blockchain/DLT, Barclays UK Ventures*

4.30pm Unlocking Blockchain – Innovation at Santander

- Hear examples of where blockchains and adjacent technologies are delivering value within Santander
- Benefit from an overview of one pay FX, the first blockchain-based international money transfer service to understand how Santander's new initiative works
- Listen to the journey that Santander have undertaken to move this project from POC to deployment

Ildefonso Olmedo, *Head of Innovation, Santander UK*

5.00pm End of Workshop
